

$$\Delta\phi = \frac{2\pi}{\lambda} \Delta X = \frac{2\pi}{v} \Delta X = \frac{2\pi}{340} (0.425) = \frac{\pi}{4}$$

15 Period of oscillation, $T = 2\pi \sqrt{\frac{m}{k}}$ dependent on mass and spring constant.

Damping increases the period of oscillation slightly.

16 6 minima means 6 internodal distances have passed through the microphone
