

Resultant amplitude  $x = \sqrt{(2A^2 - 2A^2 \cos 120^\circ)} = \sqrt{3} A$

**18 D**

$$d \sin\left(\frac{\theta}{2}\right) = 2\lambda$$

$$d = \frac{2\lambda}{\sin\left(\frac{\theta}{2}\right)}$$

**19 A**

$$3.0 \times 10^2$$
