

30	Which statement concerning α -particles is correct?	
	A	An α -particle has charge $+4e$.
	B	An α -particle is a helium atom.
	C	An α -particle has mass $4u$.
	D	When α -particles travel through a sheet of gold foil, they make the gold radioactive.

	Ans: C – An alpha particle is a helium nucleus with a charge of $2e$ and mass $4u$.
