

5	An object, made from two equal spherical masses joined by a light rod, falls with uniform speed through air. The rod remains horizontal. Which statement about the equilibrium of the system is correct?	
	A	It is not in equilibrium because it is falling steadily.
	B	It is not in equilibrium because it is in motion.
	C	It is not in equilibrium because there is a resultant torque.
	D	It is in equilibrium because there is no resultant force and no resultant torque.

	Ans: D
