

5	D	$s = ut + \frac{1}{2} at^2$ Since $u = 0$, $s = \frac{1}{2} at^2$; graph of s vs t^2 will be a straight line passing through origin i.e. Graph 1 $v^2 = u^2 + 2as$ Since $u = 0$, $v^2 = 2as$; $v = \sqrt{2as}$, hence $mv = m\sqrt{2as}$; graph of mv vs s will be square root graph i.e. Graph 4
6	C	Change in momentum = Average force x time $m[v - (-u)] = Ft$
