

		Since $u = 0$, $v^2 = 2as$; $v = \sqrt{2as}$, hence $mv = m\sqrt{2as}$; graph of mv vs s will be square root graph i.e. Graph 4
6	C	Change in momentum = Average force x time $m[v - (-u)] = Ft$ $0.060(v + 45) = 95 \times 70 \times 10^{-3}$ $V = 66 \text{ ms}^{-1}$
7	C	Regardless of the nature of the wall, it will exert a normal contact force (horizontally) on to the ladder. To balance it, a horizontal force acting to the
