

		$5700 \text{ V}_m = 6900 \text{ V}_w$ $V_w / V_m = 57/69 = 0.826$
	9	B The only forces acting on the mass are the tension and the weight, which combines to a resultant centripetal force.
	10	B Since $W = \frac{GMm}{r^2}$ and $-U = -\frac{GMm}{r}$, the new weight becomes
