

$$(2.0 \times 10^{-3})$$

Q14 Ans: C

Distance between successive minima,

$$x = \frac{\lambda D}{a} = \frac{(532 \times 10^{-9})(10.0)}{10.0 \times 10^{-3}} = 0.000532 \text{ m}$$

$$\text{Number of } x \text{ in } 1.80 \text{ mm} = 1.80/0.532 = 3.4$$

Therefore, total number of minima is $3 + 1 = 4$
