

Q5 Ans: B

$$\frac{1}{2} mv^2 = mgh$$

$$v = \sqrt{2gh}$$

$$\text{Change in momentum} = 1.2[\sqrt{2gx2.0} - (-\sqrt{2gx2.8})] = \langle F \rangle \times 0.25$$

$$\langle F \rangle = 66 \text{ N}$$

Q6 Ans: A
