

		$= 0.24 \text{ V}$
27	D	r.m.s. current = $\sqrt{[(3^2 \times 4) + (9^2 \times 2)]/6} = 5.744 \text{ A}$ Mean power = $5.744^2 \times 3.5 = 115.5 \text{ W}$
28	D	The K_α lines have a higher probability of occurring hence its intensity should be higher than the K_β lines
