

		$\Delta v = \Delta p / m = 50 \text{ m s}^{-1}$
4	B	In Fig. A, $\Sigma F = ma$ $1.0 (9.81) = 1.2 a_1$ In Fig. B $\Sigma F = ma$ $0.2 (9.81) = 1.2 a_2$ $a_1 : a_2 = 1.0 : 0.2 = 5 : 1$
5	B	The board is in equilibrium. Net moment about point P is zero.
