

		$a = 7.0 \text{ m s}^{-2}$
6	A	By principle of conservation of linear momentum, $m(2v) + 3m(-v) = (m + 3m)V$ $V = -\frac{1}{4}v$ The speed of mass m is $\frac{1}{4}v$ after the collision.

Qn	Ans	Solution
7	D	Weight of boat = upthrust = weight of fresh water displaced = 35.6 kN
