

		$\approx 4.5 \text{ rad s}^{-1}$
	14	B P and S are at the centre of regions of compression. T is at the centre of a region of rarefaction. The centre of regions of compression has a phase difference of π from the centre of regions of rarefaction.
	15	D $T = 1/(1.0 \times 10^{-5}) = 1.0 \times 10^{-4}$
