

28

Answer: C

For sine wave,

$$V_{rms_1} = \sqrt{\frac{\frac{V_o^2}{2} \times T}{T}} = \frac{V_o}{\sqrt{2}}$$

For half-wave square wave,

$$V_{rms_2} = \sqrt{\frac{V_o^2 \times \frac{T}{2}}{T}} = \frac{V_o}{\sqrt{2}}$$

$$\text{Ratio required} = \frac{\frac{V_o}{\sqrt{2}}}{\frac{V_o}{\sqrt{2}}} = 1$$

29

Answer: D
