

3	Answer: A
	$3kx = mg \text{ --- (1)}$ $2kx' = mg \text{ --- (2)}$ $\frac{(2)}{(1)} : \frac{2x'}{3x} = 1$ $x' = \frac{3}{2}x$ $x' - x = \frac{3}{2}x - x = 0.5x = 0.5(0.40) = 0.20 \text{ cm}$
