

9	Answer: A
	$F_{drive} = F_{resistive} + W \sin \theta$ $\frac{60}{100} \frac{P}{v} = F_{resistive} + mg \sin \theta$ $\frac{60}{100} \times \frac{80000}{6.5} = F_{resistive} + (1000)(9.81)(\sin 45^\circ)$ $F_{resistive} = 450 \text{ N}$

10	Answer: A
----	-----------
