

		Δt 0.1
27	B	$V_o = 320 \text{ V}$ $V_{rms} = \frac{320}{\sqrt{2}} = 226 = 230 \text{ V}$ The root-mean-square voltage is the equivalent d.c. voltage that would give the same average power.
28	C	Find the instantaneous value of v at $t = 0.001$ s.
