

Qn	Ans	Solution
1	A	$s = ut + \frac{1}{2}at^2$ $h = \frac{1}{2}gt^2$ $g = \frac{2h}{t^2}$ For g to appear greater than actual, there must be systematic errors that causes h to be measured larger than actual and/or t to be measured smaller than actual.
2	C	Height of X above horizontal surface
