

Qn	Ans	Solution			
9	A	$g_{surface} = \frac{8.2}{5.0} = 1.62 = \frac{GM}{R^2}$ At $2.5R$, $g = \frac{GM}{(2.5R)^2} = \frac{1}{2.5^2} \frac{GM}{R^2} = \frac{1}{2.5^2} (1.62) = 0.26 \text{ N kg}^{-1}$
