

|    |          |                                                                                                                                                                        |
|----|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    |          |                                                                                                                                                                        |
| 24 | <b>B</b> | Current source at Q cannot produce the magnetic field at Q. Hence consider only P. Using right hand grip rule, the direction of current must be out of the plane at P. |
| 25 | <b>A</b> | Due to the direction of current flow in Y, the end of Y facing X will produce a                                                                                        |
