

		hence, $v = \frac{1}{2}at$ Plotting P against t, gives gradient of $\frac{1}{2}aF$, through origin.
9	B	Only actual forces should be presented on a FBD, so there should only be the weight of the aircraft and lift force on the aircraft, directed normal to the plane of the wings.

10	A	At steady state bulb X and Y have the same pressure so $V_X = V_Y$
