

photoelectrons.

- 28 D** proton with the same v but bigger m than electron will have a much larger momentum p (more than 1000 times)

Rings will not be observable.

- 29 A** $\lambda = \frac{h}{p} = \frac{h}{mv} = \frac{6.63 \times 10^{-34}}{9.11 \times 10^{-31} \times 10^6} = 7.27 \times 10^{-10} \text{ m}$ (1)
