

Q25 Ans: C

Option A: Mean power dissipated = $\frac{\left(\frac{V_0}{\sqrt{2}}\right)^2}{8.0} = \frac{\left(\frac{60}{\sqrt{2}}\right)^2}{8.0} = 225 \text{ W}$

Option B: Mean power dissipated = $\frac{1}{2} (225) = 112.5 \text{ W}$

Option C: Mean power dissipated = $\frac{V_0^2}{8.0} = \frac{(60)^2}{8.0} = 450 \text{ W}$

Option D: Mean power dissipated = $\frac{1}{2} (450) = 225 \text{ W}$

Q26 Ans: B
