

1. The speed of a wave in deep water depends on its wavelength L and the acceleration of free fall g .

What is a possible equation for the speed v of the wave?

A $v = \frac{2\pi g}{L}$

B $v = \frac{gL}{4\pi^2}$

C $v = 2\pi\sqrt{\frac{g}{L}}$

D $v = \sqrt{\frac{gL}{2\pi}}$
