

17. Which one of the following statements concerning forced vibrations and resonance is correct?
- A An oscillating body that is not resonating will return to its natural frequency when the forcing vibration is removed.
 - B At resonance, the displacement of the oscillating body is 180° out of phase with the forcing vibration.
 - C A pendulum with a dense bob is more heavily damped than one with a less dense bob of the same size.
 - D Resonance can only occur in mechanical systems.
