

23	D	Magnetic flux due to P = $\frac{3}{2}(0.1) \mu_o = 15 \mu_o$ Magnetic flux due to Q = $\frac{5}{2}(0.2) \mu_o = 12.5 \mu_o$ Hence magnetic field of P should point out of the paper and Q into the paper.
24	B	Total weight of wire = $0.02000 \times 9.81 = 0.1962N$ Magnetic force is upwards so tension now = weight – magnetic force
