23 The diagram shows two long, straight, parallel wires, separated by a distance *d*. Wires P and Q carry currents of 4.0 A and 3.0 A, respectively, in the directions shown.

Commented [YKW(12]: Put arrows in the middle of the lines

Commented [CHN(13R12]: Done

At a point on the line OX, the resultant magnetic flux density due to the currents in the two wires is zero.

What is the distance of this point from P?

	distance from P	position
A	$\frac{3}{7}d$	between the wires
B	$\frac{4}{7}d$	between the wires.
C	4d	to the left of P
D	4d	to the right of Q
