3 A car is travelling in a straight horizontal line at a constant speed of 20 m s^{-1}. Rain falls vertically downwards and enters an open container fixed securely to the car at a constant rate of 0.50 kg s^{-1}. After entering the container, the rainwater moves horizontally with the car.

What is the horizontal force exerted by the container on the car as a result of collecting the rain?

A 0 N

B 5.0 N

C 10 N

D 20 N
