3 X and Y are two objects on a frictionless table connected by a string. The mass of X is 2 kg and the mass of Y is 4 kg. The mass of the string is negligible. A constant horizontal force of 12 N acts on Y.

What are the acceleration of Y and the magnitude of the tension in the string?

	Acceleration of Y / m s^{-2}	Tension in the string / N
A	2	4
B	2	6
C	3	4
D	3	6
